

SUMMIT

TECHNOLOGY GROUP

Summit Technology Group Offers Architects a Roadmap to the Cloud

Exclusive Offer for AIA PA Member Firms

Summit Technology Group will help you evaluate the adoption of a cloud-based infrastructure and how this strategic decision can bring a competitive advantage to your firm in the AEC industry. A modern cloud infrastructure will not only enable safe and secure remote work, but fundamentally change how architects' structure, operate and manage their projects.

Members Will Receive a Personalized Roadmap to the Cloud Package Including:

Firm Technology Snapshot | Gain a clearer understanding of where you are today with this detailed overview.

On Premise vs Cloud Comparison Sheet | Delve into your virtualization options and compare.

High Level Modernization Roadmap | Outline your transition to cloud-based technologies and the recommended implementation schedule.

Migration Considerations | Moving to the cloud doesn't have to be difficult, but every firm is unique. Know what to watch for and how to navigate with these considerations for your firm.

Operating in the Cloud Insight | Learn success stories of how others in your industry are navigating, implementing, and managing their firms with these technologies.

Cloud Desktop Demo | Get your hands on a cloud desktop with design applications and your project files loaded. When you can touch, see and test it makes the technology more attainable and your mind can begin to see the value it can bring to your organization.

Steps Involved:

Initial Virtual Meeting & Questionnaire

Interactive Virtual Whiteboarding Session

Delivery of Your Firm's Personalized Roadmap to the Cloud Package

Offer available through May 31st. There is no cost or obligation to AIA PA Member Firms.
