

AE Works Expands Team with Two Key Leadership Hires

Strategic appointments support the firm's continued growth and delivery of integrated building design services nationwide

PITTSBURGH, PA / October 14, 2026 — AE Works, a nationally recognized building design and consulting firm, announces the appointments of Kenny Martin, AIA, as Senior Vice President, Operations, and Steve Reigh, PE, HBDP, as Engineering Practice Director. The additions strengthen the firm's operational leadership as AE Works continues to expand its integrated design capabilities and serve clients across commercial, government, higher education, energy and infrastructure markets nationwide.

As AE Works approaches its 20th anniversary in 2027, the firm continues to invest in the people, expertise and resources needed to support its growth and deliver complex building projects.

“Bringing leaders of Kenny and Steve’s caliber to our leadership team is a crucial step in scaling our firmwide operations,” said Dave Andros, President and Chief Operating Officer of AE Works. “Their combined expertise in project delivery and technical excellence ensures we are positioned to provide even greater value to our clients across the country, while maintaining the high standards of quality that define our work.”

Together, these new hires bring decades of deep industry knowledge and proven track records in guiding complex building projects from concept to execution. Their leadership arrives at a pivotal moment as AE Works expand its multidisciplinary capabilities to meet rising market demand.

Kenny Martin, AIA, Joins AE Works as Senior Vice President, Operations

A licensed architect and accomplished operations leader, Kenny brings more than 20 years of experience strengthening multidisciplinary teams, improving project delivery and supporting organizational development. As Vice President, Operations, he will lead firmwide technical operations across architecture, engineering, and planning + project services, supporting AE Works' continued momentum in the Government, Engineering & Infrastructure, and Higher Education markets while helping teams deliver exceptional value for clients.

Steve Reigh, PE, HBDP, Joins AE Works as Engineering Practice Director

A licensed professional engineer and ASHRAE High-Performance Building Design Professional (HBDP), Steve brings more than 15 years of experience leading multidisciplinary engineering teams and delivering innovative, high-performance building solutions across education, healthcare, government, civic, and commercial markets. As Engineering Practice Director, Steve will lead the advancement and technical excellence of AE Works' building engineering practice, mentor future engineering leaders, and help advance integrated, client-focused solutions that make building projects a better value.

Positioned for Future Growth

The addition of Kenny and Steve reflects AE Works' ongoing commitment to top-tier talent and technical capabilities as the firm prepares for its next decade of growth. By combining strategic operational leadership with specialized engineering expertise, AE Works continues to strengthen its integrated approach to project delivery, providing innovative, sustainable solutions that deliver lasting value for clients.

AE WORKS
